

Sciteline Insights brings you a monthly snapshot of new tools, proven impact and practical lessons to help clinical teams work smarter and accelerate progress.

FEBRUARY INSIGHTS

Research, Care & Connection

Over the past year, a clear signal has emerged across healthcare, research, and digital health conversations: **clinical research is moving closer to care.**

In January, we published a blog examining how this shift is showing up across sites and care environments as access pressures grow. February brings a focus on connection and trust, further sharpened by the introduction of the *Connected Care for Canadians Act* on February 4. This month's blog looks at the infrastructure and governance required to support that integration responsibly.

Together, these blogs reflect what we're seeing across conference discussions over the past year, with February's post grounding those signals in recent federal policy direction.

What We're Seeing

Clinical Research as a Care Option: Why the Lines Are Blurring and Why That Matters

Clinical Research as a Care Pathway

As trials move closer to care environments, clarity matters. Participation must remain voluntary, expectations realistic, and communication transparent.

What Enables It

Connection Makes Integration Possible

If research is part of care, systems must support trust. Governed data sharing, connected infrastructure, and patient choice are foundational—especially as expectations for interoperability rise.

Trust, Data Sharing, and the Infrastructure Behind Choice

UPCOMING EVENTS

March brings us to Manitoba. Sciteline will be heading west before returning home for a conference in Toronto. We look forward to connecting.

Manitoba Bioscience Hill Day

March 10, 2026
Winnipeg, MB

Manitoba Life Sciences Policy Summit

March 11, 2026
Winnipeg, MB

Bioscience Association Manitoba Industry Celebration Dinner

March 11, 2026
Winnipeg, MB

Digital Health Canada Ontario 2026 Conference + Meetup

March 19, 2026
Toronto, ON
